

September 2025

Dear Parent or Carer,

Height and weight checks for children in reception and year 6

Every year in England, school children in reception and year 6 have their height and weight checked at school. This is called the National Child Measurement Programme (NCMP). The checks are carried out in a safe way by registered school nurses or trained health and care providers. Children are measured fully clothed, except for their coats and shoes, in a private space away from other pupils. You can watch the [NCMP process animation](#). The animation explains the process of the NCMP and why it is important. It will guide you through what it involves, how your child's data is collected and processed and what it will be used for.

Your child's class will take part in this year's programme.

Why do we need to measure children?

Children's height and weight measurements are collected to build an understanding of how children are growing. The information from the NCMP is used by local councils and the NHS to plan the provision of health and leisure services for families to promote healthier growth in children.

What information is collected and why

Your child's height, weight, age, sex, and date of birth are collected to calculate their weight category (also known as child body mass index).

Your child's ethnicity and address are collected to monitor differences in child growth and weight between ethnic groups, where children live and their backgrounds.

Your child's name, date of birth and NHS number are collected to link their measurements from reception and year 6 to other information from health and education records held by NHS England, the Department of Health and Social Care and the Department for Education, where it is legal to do so

Information about how personal information and data is collected and stored

You can read more about how the Department of Health and Social Care collects, stores and uses your child's information and data in the [National Child Measurement Programme privacy notice](#).

You can read more about how NHS England collects, stores and uses your child's information and data at [National Child Measurement Programme \(NCMP\): GDPR information](#). At the NHS England National Child Measurement Programme webpage you can read more about:

- taking part in the programme
- how your data is collected
- how your data is used

You can read more about how Young Greenwich School Nursing collects, stores and uses your child's information at www.young-greenwich.org.uk/privacy-policy

How you can withdraw your child from the National Child Measurement Programme

If you are happy for your child to be measured, you do not need to do anything.

If you do not want your child's height and weight to be measured, or your child has a medical condition that affects their height or weight, please let us know by emailing us your child's full name, date of birth and school using the contact details provided below;

oxl-tr.NCMP@nhs.net

Children will not be made to take part on the day if they do not want to.

How is a child's mental health and wellbeing considered in the NCMP

The wellbeing of children and families is very important to the programme. Measurements are conducted in a sensitive way, in private and away from other children. Individual feedback is not shared with your child or their school.

The weight and height information is shared only with you, either through a parent/ carer feedback letter or telephone call. It is your choice to share or not share the information with your child.

If you are concerned about your child's growth, weight, body image or eating patterns, seek further support from a school nurse or GP.

Yours sincerely,

Samantha Bennett
Director of Public Health
Royal Borough of Greenwich

Florence Kroll CBE
Director of Children's Services
Royal Borough of Greenwich

Jenny Ioseliani
Director of Children & Young People's Service
Oxleas NHS Foundation Trust

Further information for parents
